

## LOCK AND LOCKER MAINTENANCE SERVICE

Locker Pro has decades of experience at maintaining student book locker systems for secondary schools across the southeast. We are currently working on an annual basis with over 700 schools in Alabama, Georgia, Tennessee, Florida, Kentucky and Mississippi. Our unique service relieves the annoyances normally associated with administrating a student book locker system.

Annually, during the summer months and at a time convenient to each school, a **Locker Pro** crew provides onsite service to existing lockers and/or built-in combination locks. Services include the following:

- Inspect, tighten, align and lubricate each locker
- Repair and replace parts where needed
- Provide built-in locks if needed
- Replace missing nuts and bolts
- Re-set each lock combination and check for proper function
- Furnish student assignment cards and numerical listing of lockers and combinations
- Leave locker system checked and ready for student assignment and use
